When you are looking for solutions that fit ...

Children are not small adults. Anatomical and physiological differences between infants, children and adults make even the normal pediatric airway difficult for the inexperienced intubator. So adequate experience as well as the right instrument is needed for airway management in the pediatric population.

The C-MAC® HD series from KARL STORZ, a pioneer in the field of airway management, provides a custom-fit solution that meets stringent demands in pediatrics and neonatology. The continuous expansion of the product portfolio and the realization of a universal C-MAC® system interface supports the system approach of the HD line. In the field of pediatrics, this also leads to a fully flexible intubation platform for anesthesiology and emergency medicine in the clinical setting.

No matter if it is a routine, anticipated difficult, or unanticipated difficult intubation – the intubation instruments from KARL STORZ offer the right solution to the daily challenges encountered in airway management. Six different blades are now available for video laryngoscopy in pediatrics and neonatology: MILLER 0, 1 and 2, MACINTOSH 0 and 2 as well as the D-BLADE Ped. The latter was especially designed for managing difficult airways in children and closes the gap between MACINTOSH video laryngoscopes and flexible endoscopes.

The C-MAC® HD MONITOR, which allows the simultaneous connection of two endoscopes at the same time, offers the possibility to plan and execute intubation with a single system.

The Gold Standard: The C-MAC® FIVE for the Anticipated Difficult Airway

Fine, fast, focused – the new visualization in flexible intubation

With the 3.0 x 51.5 and 4.0 x 65 flexible intubation videoendoscopes (FIVE), KARL STORZ once again sets a new direction in airway management. Similar to the C-MAC® HD Video Laryngoscopes, the FIVEs deliver clear, pixel-free images without a Moiré effect.

The flexible intubation videoendoscopes are directly connected to the C-MAC® HD MONITOR. This allows you to switch to the video laryngoscope very rapidly whenever necessary.

- Compatible with the C-MAC® HD MONITOR
- Compact design and ergonomic handle shape
- Checks positioning of double lumen tubes (DLT)
- For airway inspection
- Practical tube fixation thanks to the special tube holder
- High image resolution and 4:3 video format
- Integrated LED light source
The C-MAC® FIVE S
Choice changes everything!

Although this endoscope is designed for single use, you can expect the same standards as you would from any other endoscope from KARL STORZ. With respect to sheath stiffness, precise deflection and image quality in particular, we applied the quality standards of our reusable FIVE to the FIVE S.

- Be inspired by our image quality and combine our reusable FIVE with our FIVE S single-use endoscopes
- Very good maneuverability, thanks to the special sheath design with additional rigidity, tailored to your indications in airway management
- Perform suction at the touch of a button with a working channel diameter of 1.2 mm
- Let yourself be impressed with the practical tube fixation on the handle and the good gliding properties when withdrawing the endotracheal tube
- Enhance your workflow flexibility and efficiency and benefit from permanent product availability without complex reprocessing cycles thanks to our sterile packaging
Accessories: Little things that make work easier
