Large Animal Videoendoscopes
Veterinary Videoendoscopes from KARL STORZ
New benchmarks for image quality and versatility

KARL STORZ has set a new benchmark for image quality. The application of the latest innovations in digital technology, high-resolution CCD chips and improved lens systems realize a unique grade of image sharpness in endoscopy. By using two light carriers positioned opposite each other, together with an intelligent digital processor technique, a uniform image brightness is realized, even under difficult lighting conditions.

Available in a variety of sizes, KARL STORZ multipurpose veterinary videoendoscopes are ideal for numerous large animal applications: Gastroscopy, esophagoscropy, tracheoscopy, hysteroscopy, urethrocystoscopy, rhinoscopy, pharyngoscopy and laryngoscopy.

Special features:
- High resolution, true color images
- Large depth of field 2-200 mm
- Durable technology
- Uniform image brightness, even under difficult lighting conditions
- 140° wide angle telescopes with high light transmitting capacity
- Enhanced control, easy to operate
- Optimal position of control functions
- Graduated, torsion-proof insertion sheath with different degrees of flexibility
- Optimal instrument passaging, even at extreme angles
- Robust supply sheath with standard connections

For reusable and disposable instruments see the VETERINARY ENDOSCOPY – LARGE ANIMALS catalog.
Equine Laryngeal Forceps
For use alongside videoendoscopes

60370UC  **Equine Laryngeal Forceps**, curved, with hemostat ratchet, double action jaws, sheath diameter 2.5 mm, jaw width 4 mm, length 60 cm

For reusable and disposable instruments see the VETERINARY ENDOSCOPY – LARGE ANIMALS catalog.
Cleaning & Sterilization Tray

Makes cleaning and sterilization of veterinary videoendoscopes of all sizes easier, faster and more precise.
The cleaning and sterilization system includes a 30 liter volume soaking basin, a perforated storage tray and a lid. The storage tray can easily be taken in and out of the soaking basin at any time during the cleaning and sterilization process. A built-in valve allows for easy drainage of fluids.

60647V Cleaning and Disinfection Basin, for the manual cleaning and disinfection of videoendoscopes, 30 l, with drain tap, external dimensions (w x d x h): 615 x 400 x 220 mm including:
Soak Basin
Perforated Storage Tray
Lid
