C-MAC® – The Premium Class
The all-round tool for the emergency room
C-MAC® S video laryngoscopes (for single use)
- C-MAC® S IMAGER with C-MAC® system interface
- C-MAC® S video laryngoscopes available as MAC #3, MAC #4 and D-BLADE versions
- Optimal protection against cross-contamination as blade and handle form one continuous piece
- Extremely high tensile strength
- Compact design with ergonomic handle

Gold standard for the difficult airway
The Flexible Intubation Video Endoscope (FIVE) delivers pixel-free images without Moiré pattern in a 4:3 rectangular format for:
- Endotracheal intubation
- Foreign body removal
- Inspection of the airways, bronchoscopy if necessary
- Monitoring dilation tracheotomy

Flexible diagnosis
- Video otoscope for a high-resolution view of the tympanic membrane and ear injuries
- Video rhino-laryngoscope for optimal diagnosis and documentation of trauma to the nose and the laryngeal area
- C-CAM® camera head enables rigid and flexible telescopes to be connected to the C-MAC® monitor for the visualization and documentation of trauma

Maximum portability: POCKET MONITOR
Part of the C-MAC® system and can be used with the same C-MAC® video laryngoscopes
- 3.5" OTI® (Open-to-Intubate) display with wide viewing angle of 160°
- Uninterrupted readiness at no extra cost thanks to exchangeable and rechargeable battery
C-MAC® video laryngoscopes (reusable)

- Standard MACINTOSH and MILLER laryngoscopes for safe intubation in infants, children and adults
- Highly curved D-BLADE and D-BLADE Ped for the particularly difficult airway
- Robust and lightweight: High stability and resistance to impact; light metal design

Airway management, preliminary diagnosis and documentation for the emergency room

It is recommended to check the suitability of the product for the intended procedure prior to use.
