

In-House Training Solutions for Everyone:

The concept of the European Academy for Gynaecological Surgery (EAGS)

In-House Training Solutions for Everyone: Principles of the GESEA programme

Scientific evidence indicates that dry lab training for endoscopic surgical skills, prior to training in the operating room, improves patients' post-operative well-being substantially.

The ESGE, EBCOG, EAGS, ENTOG, ACOG and AAGL, six leading professional organisations in gynaecology, joined forces in a global recommendation regarding endoscopic surgical training and quality assurance. It is a major breakthrough in the discipline of gynaecological endoscopic training to align the leading societies in training and education across Europe and the US on such an important matter.

The Gynaecological Endoscopic Surgical Education and Assessment (GESEA) programme is a structured diploma programme for Gynaecological Endoscopy which takes into account this recommendation. It trains and certifies knowledge and practical skills prior to surgical competence, and it is the official diploma programme of the European Society for Gynaecological Endoscopy (ESGE). The most important aspect throughout this programme is the practise of both training and testing, leading to greater levels of competence and professionalism prior to entering the operating room.

The GESEA programme makes use of three endoscopic training models that monitor the learning process and measure the skill level of an individual. LASTT provides a validated training approach for basic laparoscopic instrument handling skills like camera navigation, hand-eye coordination and bimanual coordination. SUTT focuses on laparoscopic suturing skills by offering a series of stitching and knotting exercises to train and test the quality level of needle handling, stitching, tissue approximation and knot tying. The HYSTT training model trains hysteroscopic camera navigation and instrument handling by making use of a model that simulates the female genital anatomy. The Online Scoring Platform (OSP) is the central platform to manage all in-house GESEA training and testing activities.

The LASTT/SUTT Training Station

26300 LASTT/SUTT Training Station including:

26348

SZABO-BERCI-SACKIER **Laparoscopic Trainer**, with suturing top plate

TP101

TELE PACK +, endoscopic video unit with 2 camera inputs (X-LINE and C-LINE) for use with flexible videoendoscopes and one-chip camera heads (up to FULL HD), incl. LED light source, digital Image Processing Module with USB and network storage options as well as 18.5" FULL HD touch screen monitor, power supply 100-240 VAC, 50/60 Hz,

including:

400F

Mains Cord, length 300 cm

TH130

H1 Camera Head, one-chip HD camera head, progressive scan, low-temperature sterilization, focal length $f = 19$ mm, 2 freely programmable camera head buttons

495NCS

Fiber Optic Light Cable, with straight connector, extremely heat-resistant, enhanced light transmission, diameter 4.8 mm, length 250 cm

26003AA

HOPKINS® Straight Forward Telescope 0°, enlarged view, diameter 10 mm, length 31 cm, **autoclavable**, fiber optic light transmission incorporated, color code: green

26003BA

HOPKINS® Forward-Oblique Telescope 30°, enlarged view, diameter 10 mm, length 31 cm, **autoclavable**, fiber optic light transmission incorporated, color code: red

33321MD

CLICKLINE KELLY Dissecting and Grasping Forceps, rotating, dismantling, insulated, with connector pin for unipolar coagulation, size 5 mm, length 36 cm

34321MS

CLICKLINE METZENBAUM Scissors, rotating, dismantling, insulated, with connector pin for unipolar coagulation, size 5 mm, length 36 cm

33321KW

CLICKLINE MATKOWITZ Grasping Forceps, rotating, dismantling, insulated, with connector pin for unipolar coagulation, size 5 mm, length 36 cm

26173KPF

KOH **Macro Needle Holder**, with tungsten carbide insert, ergonomic pistol handle with disengageable ratchet, jaws straight, size 5 mm, length 33 cm

26173KAF

KOH **Macro Needle Holder**, with tungsten carbide insert, ergonomic axial handle with disengageable ratchet, jaws straight, size 5 mm, length 33 cm

LASTT Training Package

to be used with the LASTT/SUTT Training Station

The Laparoscopic Skills Training and Testing (LASTT) method provides three validated laparoscopic exercises to train and test the individuals on their laparoscopic psychomotor skills. The LASTT Training Package contains the LASTT model, representing the spatial distribution and orientation of the different planes and angles of a female pelvis. The first exercise measures the ability of a person to navigate the camera and to handle the 30° optic, 14 targets have to be identified in a precise order. The second exercise measures the hand-eye coordination by positioning 6 small rings over a nail and the last exercise measures the bimanual coordination by transporting 6 objects from one hand to the other and then into a corresponding hole. Test proficiency should guarantee the perfect laparoscopic instrument handling capabilities.

The individual scores can be entered on the Online Scoring Platform (OSP) to generate test reports.

26436 LASTT Training Package
including:
Wooden LASTT Model
Exercise Inserts
Exercise Elements
Academy Stopwatch
USB Stick with Instructions

SUTT Training Package

to be used with the LASTT/SUTT Training Station

The SUTT Training Package contains a complete setup to perform training according to the Suturing and Knot Tying Training and Testing (SUTT) method. It provides a series of tests on stitching and knotting that have been defined to train and test the quality level of needle handling, stitching, tissue approximation and knot tying. The SUTT Foam Base with disposable SUTT pad is placed inside a SZABO-BERCI-SACKIER Pelvic Trainer box. SUTT1 provides one exercise in stitching and knot tying using the dominant hand. SUTT2 provides 4 exercises evaluating the precision of needle manipulation, intra-corporeal knotting and tissue approximation using both dominant and non-dominant hands.

The individual scores can be entered on the Online Scoring Platform (OSP) to generate test reports.

26437 SUTT Training Package

including:

SUTT Foam Board

10 disposable SUTT1 Pads for Training

10 disposable SUTT2 Pads for Training

Academy Stopwatch

USB Stick with Instructions

Additional Spare Parts:

2643930

SUTT 1 Pads,
for training, KARL STORZ branded,
to be pinned on SUTT Foam Base

2644030

SUTT 2 Pads,
for training, KARL STORZ branded,
to be pinned on SUTT Foam Base

Hysteroscopic Skills Training and Testing Model (HYSTT)

The Hysteroscopic Skills Training and Testing (HYSTT) method has been designed to train Hysteroscopic Psychomotor Skills (HPS) needed to work in a “keyhole” setting. The HYSTT Training Package contains the HYSTT model, representing the spatial distribution and orientation of the different planes and angles of a normal uterus. The exercises simulate all possible movements one should perform during a hysteroscopic procedure. Exercise 1 evaluates the skills of an individual to handle the camera and work with a 30° optic in an hysteroscopic environment. Various sets of modules are used in order to eliminate the memory effect for the participants. Exercise 2 evaluates the skills of simultaneous camera and instrument handling and hand-eye coordination skills as its goal is to grasp and extract 14 pins.

The individual scores can be entered on the Online Scoring Platform (OSP) to generate test reports.

26301 HYSTT Training Station including:

TP101

TELE PACK +, endoscopic video unit with 2 camera inputs (X-LINE and C-LINE) for use with flexible videoendoscopes and one-chip camera heads (up to FULL HD), incl. LED light source, digital Image Processing Module with USB and network storage options as well as 18.5" FULL HD touch screen monitor, power supply 100-240 VAC, 50/60 Hz,

including:

400F

Mains Cord, length 300 cm

TH130

H1 Camera Head, one-chip HD camera head, progressive scan, low-temperature sterilization, focal length $f = 19$ mm, 2 freely programmable camera head buttons

495NA

Fiber Optic Light Cable, with straight connector, diameter 3.5 mm, length 230 cm

26120BA

HOPKINS® Forward-Oblique Telescope 30°, diameter 2.9 mm, length 30 cm, **autoclavable**, fiber optic light transmission incorporated, color code: red

26153BIK

BETTOCCHI® Inner Sheath, size 4.3 mm, with working channel for semirigid 5 Fr. operating instruments, for use with Outer Sheath 26153BOK including:
Inner Sheath
LUER-Lock Tube Connector

26153BOK

BETTOCCHI® Outer Sheath, size 5 mm, for use with Inner Sheath 26153BIK including:
Inner Sheath
LUER-Lock Tube Connector

2x 26159UHW

Biopsy and Grasping Forceps, semirigid, double action jaws, 5 Fr., length 34 cm

HYSTT Training Package to be used with the HYSTT Training Station

26438 **HYSTT Training Package**
including:
Female genital model, with table fixation
3x HYSTT Exercise 1 models
3x HYSTT Exercise 2 models
HYSTT Replacement Pins,
USB Stick with Instructions

Additional Spare Parts:

26441 **HYSTT Replacement Model Set, Exercise 1**, package of 3 pieces

26442 **HYSTT Replacement Model Set, Exercise 2**, package of 3 pieces

26443 **HYSTT Replacement Pins, 1 set** containing 100 black, 100 blue, 100 red and 100 yellow pins

GESEA E-Knot Trainer

The GESEA E-Knot Trainer is a pelvic trainer developed by the European Academy of Gynaecological Surgery (EAGS) that can be used in a simple way at any location, offering the possibility to train suturing skills. The GESEA E-Knot Trainer is designed for individuals, no further equipment besides a laptop and sutures is required.

- 26445 **GESEA E-Knot Trainer** (with Needle Holders) including:
E-Knot Trainer (including SUTT for a Pelvic Trainer – 1x NeoDerma Suturing Pad; 1x White Base; 4x E-Knot Butterfly Nuts; 4x E-Knot Rubber Feet)
USB HD camera to connect to a portable computer
USB stick with training programme by Prof. A. Wattiez
 5x **GESEA SUTT1 pad** for training
 5x **GESEA SUTT2 pad** for training
 3x **Polysorb 2-0 gl-123 v-20 75 cm**
 2x **KARL STORZ Needle Holders**

- 26444 **GESEA E-Knot Trainer** (without Needle Holders) including:
E-Knot Trainer (including SUTT for a Pelvic Trainer – 1x NeoDerma Suturing Pad; 1x White Base; 4x E-Knot Butterfly Nuts; 4x E-Knot Rubber Feet)
USB HD camera to connect to a portable computer
USB stick with training programme by Prof. A. Wattiez
 5x **GESEA SUTT1 pad** for training
 5x **GESEA SUTT2 pad** for training
 3x **Polysorb 2-0 gl-123 v-20 75 cm**

The GESEA E-Knot Trainer can be used with any laptop which contains a USB-Port. The displayed laptop is not part of the article number 26444 and 26445.

Online Scoring Platform (OSP)

The Online Scoring Platform (OSP) provides the possibility to register participants' data and test results in a central database for the LASTT, HYSTT and SUTT method. For each participant the previous exposure to endoscopy is documented. The OSP follows the trainees' improvement and provides a relevant evaluation defining their position versus the benchmarking group.

Exposure to Laparoscopy	Excellent	Fair	Insufficient
Beginner	33.3%	33.3%	33.3%
Intermediate	33.3%	33.3%	33.3%
Master	33.3%	33.3%	33.3%

Your position in the benchmark group: 10
 Your score in the benchmark group on a scale from 0 to 100: 10

Mentee name: Germaine Chouard (01/01/1990)

Exposure to Laparoscopy	Excellent	Fair	Insufficient
