SMART SCOPE
The Endoscope Adaptor for Smartphones
SMART SCOPE – The Endoscope Adaptor for Smartphones

Are you looking for a location-independent alternative for the video or image documentation of your findings?
Then the new SMART SCOPE is the right product for you. The new adaptor from KARL STORZ makes it possible to perform endoscopy with a smartphone. Standard endoscopes can be secured to a smartphone using the quick-release coupling. The connection consists of:

SMART SCOPES This technical innovation enables data documentation and sharing without compromising on convincing image quality.

Compatibility
Both rigid and flexible endoscopes are compatible with the SMART SCOPE adaptor. It is therefore suitable for various indications, particularly in the ENT field.

KARL STORZ offers the SMART SCOPE adaptor for various smartphone models. You will also need an endoscope and a light source.
Setting up the SMART SCOPE

The SMART SCOPE consists of an adaptor and a special smartphone case. The adaptor can be connected to the endoscope via the quick-release coupling. The other side of the adaptor is secured to the screw thread of the smartphone case and is thus connected to the smartphone camera. No further positioning of the lens is therefore necessary. Furthermore, the adaptor is equipped with an inbuilt tripod socket that can be attached to all standard tripods. Thanks to its high degree of mobility and flexibility, the SMART SCOPE adaptor offers good prerequisites for mobile use during home visits and in doctors’ offices.

A bag is included in delivery to protect against dust or dirt.
The SMART SCOPE in Stroboscopy

In addition to use with a standard light source, the SMART SCOPE adaptor can also be connected to the μ-Pulsar miniature stroboscopy light source in conjunction with laryngoscopes. This facilitates visualization and documentation for stroboscopy treatments. The combination of these two products offers the practice a mobile yet comprehensive solution for stroboscopy.

Product benefits offered by the μ-Pulsar miniature stroboscopy light source

- Stroboscopy and continuous light modes available
- Integrated display elements for frequency analysis
- Rechargeable
SMART SCOPE Product Benefits

• **Uncomplicated use** as all the standard functions offered by smartphones can be utilized. These include image zoom, autofocus, image and video recordings as well as data transfer from a smartphone to a doctor’s office computer system. Special apps for image processing are also offered.

• **Image capture via voice control command or voice-activated shutter release** for the Apple iPhone® series with, for example, the app “CameraMic”; no additional app required for the Samsung series.

• **Wireless transfer of images to a doctor’s office computer system** with the apps “Wifi Photo” or “Photo Sync” for the Apple iPhone® series and the app “Wifi File Transfer” for the Samsung Galaxy series.

• **Screen sharing with other units** with apps such as Airplay and Miracast for the display of images across multiple units.

• **Cost-effective solution for stroboscopy** in combination with the μ-Pulsar miniature stroboscopy light source.

Can be used anywhere and at any time (PLUG & PLAY)

Allows information sharing and exchange with colleagues

Ready for use immediately

Compatible with various smartphones and endoscopes

Photos and videos can be recorded and transmitted to a third party.
**Model Variants**

**202880 01-I6**  
**SMART SCOPE with iPhone 6/6s Holder,**  
for coupling a smartphone camera to an endoscope,  
for straightforward documentation of endoscopic images or videos on a smartphone, compatible with all endoscopes with standard eyepieces.  
The set comprises:  
**SMART SCOPE**  
iPhone 6/6s Holder

**202880 01-I7**  
**SMART SCOPE with iPhone 7/8 Holder,**  
for coupling a smartphone camera to an endoscope,  
for straightforward documentation of endoscopic images or videos on a smartphone, compatible with all endoscopes with standard eyepieces.  
The set comprises:  
**SMART SCOPE**  
iPhone 7/8 Holder

**202881 00-IX**  
**SMART SCOPE with iPhone X Holder,**  
for coupling a smartphone camera to an endoscope,  
for straightforward documentation of endoscopic images or videos on a smartphone, compatible with all endoscopes with standard eyepieces.  
The set comprises:  
**SMART SCOPE**  
iPhone X Holder
It is recommended to check the suitability of the product for the intended procedure prior to use.
