KARL STORZ — ENDOSKOPE

The Family Company

Dr. h. c. mult. Sybill Storz,
Chair of the Supervisory Board

Karl-Christian Storz,
Managing Director

The Future has Tradition,
but Tradition too has a Future

A Global Family Company

For more than 70 years, we have been a manufacturer of medical technology products with roots firmly established in the Tuttlingen region (Baden-Württemberg).

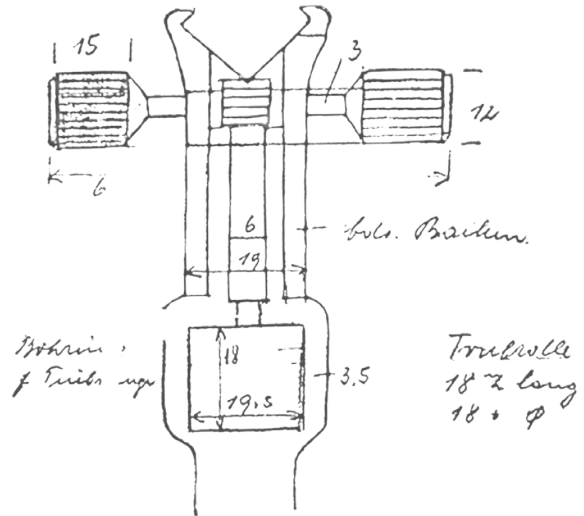

We take responsibility for our behavior towards employees, customers and business partners. Fairness and integrity in all our dealings with business partners and society determine how we conduct our market activities worldwide.

To achieve this goal, we rely on well-qualified employees that are equally committed to quality and innovation.

It is only consistent that employees play a key role in this managerial paradigm. Any company's success is the result of its people, who contribute their skills and thereby advance ideas. Consequently, our company strives to create long-term relationships with our employees, support them through advanced training, and thereby pool experience.

Dr. med. h.c. Karl Storz (1911 – 1996)

What challenges us Outstanding quality in everything we do

History and Future

Since its beginnings in 1945, the KARL STORZ family company has grown into a global manufacturer and distributor of endoscopes, medical instruments, and devices. Not a giant on an international scale but leaders in matters that count: Creativity, versatility and competence.

This guiding statement of company management is well known to each and every KARL STORZ staff member. It stands for the characteristics that are at the root of the company's success: Visionary ideas that are grounded by traditional, precise workmanship and are integrated into a concept of sustainable entrepreneurship. With this recipe for success, the company confidently faces future challenges. Long-term, sustainable development is always our primary concern.

Finding even better technological solutions for endoscopy is what drives us forward. Technological milestones from the past motivate us while advances in medicine fascinate us. Our goal is to further consolidate our technological leadership in the future. Innovation – Made by KARL STORZ.

What we share
A passion for
medical technology

Tuttlingen Location and Surroundings

Commitment to our regional roots and a sense of responsibility for the town of Tuttlingen are still alive and well in the second and third generation of our company's management.

These roots are not just the result of a nostalgic attachment to our home town. They are also our commitment to the virtues and characteristics for which this region is well known – the strong solidarity and efficiency of its Swabian people and the inventive spirit Germans call “Tüfteln” or “creative tinkering”, attributes that characterize the company to this day.

Despite our strong global presence, the company's heart beats in Tuttlingen, and our resulting responsibility for the region is expressed not only in economic terms but also by our multifaceted involvement with the social and cultural life within the region. At KARL STORZ, responsibility does not end at the factory gates.

What drives us
“Best performance”
of our products and services

Products – Pillars of Endoscopy

The range of endoscopic instruments for human medicine, veterinary medicine, and industrial endoscopy now includes more than 15,000 products. The most recent KARL STORZ developments are in digital documentation systems and comprehensive operating room concepts. As a system supplier, the company combines its expertise in endoscopy with software solutions to achieve integration in the operating room and to support clinical process and resource management.

Not resting on past achievements but constantly striving for perfection is the criteria we follow for the development, material selection, and manufacturing of our high-tech products. A well-qualified and committed workforce who use their professional knowledge and expertise throughout the entire company supports us in this endeavor.

We find technical solutions that meet customer needs. Products are only successful if they are intuitive and easy to use and enable the physician to treat patients according to state-of-the-art medical and technical standards. Optimal functionality combined with top quality is both a standard and incentive for us.

What excites us Personal career opportunities worldwide

Get Ahead with KARL STORZ

Our employees show dedication and a commitment towards quality. Attractive working conditions with regard to remuneration and fringe benefits as well as opportunities for further education and training provide incentives for personal and professional success. A corporate strategy with a focus on stability and sustainability forms the basis for the company's success in which capable and motivated employees play a key role.
