The Answer
No compromises, the highest standard only
Unique Duodenoscopy System

We provide the solution.

ERCP has always been a procedure for experts. When it comes to performance and meeting the highest standards in hygiene, team members in the examination room face different challenges. KARL STORZ offers a device that can be a capable partner in bringing solutions to the examination room environment.

We are introducing a new system to the market that will raise standards even higher.

It is recommended to check the suitability of the product for the intended procedure prior to use.
- Brilliant image
- Programmable buttons with 6 dedicated functionalities
- Integrated, state of the art usage tracking module
- Unique, lightweight metal, robust, highly ergonomic control handle
- Guaranteed backward and forward compatibility
- IMAGE1 S™ FULL HD System and S-Technologies image enhancement, as standard
- LED light illumination available
- Straightforward visual control of the papilla
- Lateral visualization
Autoclavable – no compromises
Unique AUTOCLAVABLE elevator module

- Unrivalled system that can be completely brushed
- The highest reprocessing standard in duodenoscopy today
- Completely detachable elevator module with wire
- Offers sterilization level of up to 134 °C

- Detachable elevator module
- Enables brushing of the elevator wire channel
- Easy access to contamination
Complete range of solutions from KARL STORZ

KARL STORZ Imaging Systems

- KARL STORZ Monitors with unparalleled image quality
- Image processing module with S-Technologies functionality: Image enhancement for successful tissue differentiation
- Modular, interdisciplinary system
- Unique LED light source with guaranteed 30,000 working hours and integrated CO₂ insufflation
- Dedicated High Frequency unit with Gastro Mode function for everyday ease of use
- Modular Trolley system – to meet the highest workflow requirements
SCENARA®
Unified Content Management and Interoperability by KARL STORZ

SCENARA® is a platform-independent and modular software solution for data storage and administration that also features a centralized communication interface.

- SCENARA® .STORE coordinates all endoscopic data, including patient and procedure data, from various systems at a central location and thus enables fast and mobile data access.

- SCENARA® .CONNECT minimizes the complexity of the workflow via optimal interoperability between documentation solutions from KARL STORZ and other available information and archive systems from various manufacturers.

- SCENARA® .STORE and SCENARA® .CONNECT can be acquired with a service contract (optional). This includes software maintenance, troubleshooting and software updates without additional costs.
