KARL STORZ — ENDOSKOPE

HyDOME

With the introduction of the HYDOME™ system, KARL STORZ has reinforced hygiene standards in ERCP procedures, retained the performance capabilities of a standard system and provided physicians with an option to work with brand new sterile modules every time.

This system, which is unique in the market, features a sterile HYDOME™ module and an elevator wire channel that can be brushed, and ensures that neither the elevator nor the elevator wire are potential sources of cross-contamination.

reddot award 2019
winner

STERILE

- Sterile HYDOME™ elevator module
- Secured positioning with a single click
- Enables brushing of the elevator wire channel

It is recommended to check the suitability of the product for the intended procedure prior to use. Please note that the described products in this medium may not be available yet in all countries due to different regulatory requirements.
