10 Years of the C-MAC®
The System for Airway Management
The C-MAC® System: More than just a Video Laryngoscope

Every patient is unique and so is their airway. In addition to that, intubation conditions can vary from the hospital bed to a fully packed ICU or to an accident scene where the patient is trapped inside a vehicle in a very critical condition. With the C-MAC® system, our mission is to give you various alternatives, so that you can ensure the highest standard of patient safety. Together with various endoscopes, we offer the C-MAC® system with which you can minimize uncertainties and risks, as you have the right tool available for every situation.

One system makes the difference – the C-MAC®!

The Journey of the C-MAC®

It is recommended to check the suitability of the product for the intended procedure prior to use.
Evolution of Modern Airway Management

Video-assisted intubation plays an important role in modern airway management. A pioneer in the field of video-assisted endoscopic surgeries, KARL STORZ recognized very early the need to create a video laryngoscope. In the year 2000, we developed the first Video Laryngoscope – ‘X-LITE Video’ and sold it through the company Rüsch. The year 2008 saw the birth of the C-MAC® Video Laryngoscope. With this milestone, the world of Airway Management started changing very quickly. Since then, we have developed various innovative components for the C-MAC® with CMOS technology and we offer our customers a wide range of Airway Management solutions – from a single video laryngoscope to a Premium Class Airway Management System.

We create the future
One Decade of the C-MAC®

What’s Next?
Stay tuned!

Awards
2012 C-MAC® PM (POCKET MONITOR) received the distinguished EMS World Top Innovation Award
2017 The new C-MAC® PM (POCKET MONITOR) with real-time documentation received the prestigious German Innovation Prize

C-MAC® Video Laryngoscope – The 4th Generation of Video Laryngoscope by KARL STORZ with CMOS Technology

2000 X-LITE Video
The 1st Video Laryngoscope developed by KARL STORZ

2008 C-MAC® Video Laryngoscope – The 1st Video Laryngoscope

2010 D-BLADE for the C-MAC®

2012 FIVE 5.5 (Flexible Intubation Video Endoscope)

2012 The C-MAC® PM (POCKET MONITOR) with OTI® (Open-To-Intubate) Display

2013 C-MAC® S (Single-use) Video Laryngoscope

2014 FIVE 4.0 (Flexible Intubation Video Endoscope)

2016 C-MAC® Premium Class Video Laryngoscope with C-MAC® system interface

2016 C-MAC® PM (POCKET MONITOR) with Real-Time Documentation

2017 C-MAC® S (Single-use) – Now compatible with the new C-MAC® PM (POCKET MONITOR)

2017 C-MAC® Video Laryngoscope MAC #0

2017 C-MAC® S (Single-use) Premium Class Video Laryngoscope – now available for Pediatrics & Neonates

2017 FIVE 3.0 (Flexible Intubation Video Endoscope)

2018 C-MAC® VS (Video Stylet) Flexible-tip Video Stylet with C-MAC® system interface

2018 FIVE S (Flexible Intubation Video Endoscope for Single-use)

2018 Awards
2012 C-MAC® PM (POCKET MONITOR) received the distinguished EMS World Top Innovation Award
2017 The new C-MAC® PM (POCKET MONITOR) with real-time documentation received the prestigious German Innovation Prize
