Sterile Single-Use Solution, Reliable and Fast Availability
Flexible single-use video ureterorenoscope
STERILE SOLUTION MEETS AVAILABILITY

The flexible single-use video uretero-renoscope from KARL STORZ provides a sterile single-use solution that allows reliable and fast availability.

STERILE SINGLE-USE SOLUTION
In addition to the reusable flexible uretero-renoscopes, benefit from a sterile single-use solution from KARL STORZ that offers the customary reliable quality.

RELIABLE AND FAST AVAILABILITY
Eliminating sterilization ensures fast availability of the single-use video uretero-renoscope. This offers you more flexibility in product availability.

TRACEABLE
Single-use as well as reusable video uretero-renoscopes feature a data matrix code. This can be scanned so that information such as the order number, batch and expiry date can be archived in the patient documentation. This supports process safety and clinical quality management.

IMAGE QUALITY
KARL STORZ also makes no compromises in terms of image quality when it comes to single-use solutions. You can continue to rely on the best lighting conditions thanks to a powerful LED light source.
KARL STORZ PRODUCT PORTFOLIO MEETS FLEXIBILITY

The single-use video uretero-reno scope offers a flexible solution, particularly for complex cases or if use is infrequent. With single-use and reusable flexible video uretero-reno scopes, KARL STORZ offers a solution that is able to satisfy every requirement without any compromise in terms of efficiency and economy.

It is recommended to check the suitability of the product for the intended procedure prior to use.

MOBILITY
The single-use uretero-reno scope is compatible with current KARL STORZ imaging systems (IMAGE1 S™, TELE PACK +, C-MAC® III, C-HUB® II) and thus allows a high degree of flexibility – the ideal solution for each requirement.

ENVIRONMENT
Thanks to the compact construction, materials can be reduced to a minimum. This makes the flexible KARL STORZ single-use video uretero-reno scope more environment-friendly.

SLIM
The outer sheath of the flexible single-use video uretero-reno scope has a diameter of 8.5 Fr. with a working length of 70 cm and is available with positive and contrapositive deflection.

Currently not approved for CE markets.

It is recommended to check the suitability of the product for the intended procedure prior to use.
