KARL STORZ — ENDOSKOPE

## QUALITY MEETS AVAILABILITY

Delivering performance and precision at all times is one of the main requirements of medical products. The flexible single-use video endoscopes from KARL STORZ provide single-use solutions that impress in every respect.

### STERILE – INNOVATIVE – RELIABLE

Benefit from a sterile KARL STORZ product that is always new and offers the customary reliable quality.

### ALWAYS READY-TO-USE

Eliminating sterilization ensures permanent availability of the single-use video endoscopes. Workflows no longer need to be adapted to product availability, thus gaining flexibility and speed.

### TRACEABLE

Each single-use video endoscope features a data matrix code. This can be scanned so that information such as the order number, batch and expiry date can be archived in the patient documentation. This supports process safety and clinical quality management.

### EXCELLENT IMAGE QUALITY

KARL STORZ also makes no compromises in terms of image quality when it comes to single-use products. You can continue to rely on the best lighting conditions thanks to a powerful LED light source.

# ECONOMIC EFFICIENCY MEETS FLEXIBILITY

The single-use endoscope offers a more economical solution, particularly if use is infrequent or relates to complex cases. With single-use and multi-use uretero-renoscopes KARL STORZ is able to satisfy every requirement without any compromise in terms of efficiency and quality.

## COMPARISON: MULTI-USE VS. SINGLE-USE SYSTEM

### Frequent Use

#### Multi-Use System

#### Single-Use System

### Infrequent Use

#### Multi-Use System

#### Single-Use System

Cost ratios vary from clinic to clinic and from practice to practice

## ERGONOMIC

The ergonomic handle design allows fatigue-free work. Thanks to the compact construction, materials can be reduced to a minimum. This makes the flexible KARL STORZ single-use video endoscopes very pleasant and easy to use.

## SLIM

The outer sheath of the flexible single-use video uretero-renoscope has a diameter of 8.5 Fr. with a working length of 70 cm and is available with positive and contrapositive deflection.

Currently not approved for CE markets.

It is recommended to check the suitability of the product for the intended procedure prior to use.

...evolution continues
