# SIZE 3.5 PARSONS LARYNGOSCOPE THE RIGHT SIZE FOR YOUR PATIENT

## When Size 3 is Too Small & Size 4 is Too Large

At times, a size 3 PARSONS Laryngoscope is too small for the best exposure and working space for your instruments, and a size 4 is too large for your patient. Similarly, when a PARSONS Laryngoscope is used to aid the introduction of a size 4.5 rigid bronchoscope, a size 3 PARSONS is too small for the bronchoscope tube and a size 4 is once again too large for your patient. But, our size 3.5 PARSONS Laryngoscope is designed to fit that patient.

“The perfect laryngoscope for large infants to young adolescents.”

— David Parsons, M.D.

Ordering Information	
8576CC	PARSONS operating laryngoscope, size 3.5, length 13 cm
