E.P.Si.T. – Endoscopic Pilonidal Sinus Treatment

The pilonidal sinus is an acute or chronic inflammatory process in the subcutaneous adipose tissue, often occurring in the sacrococcygeal region\(^1\). E.P.Si.T. – Endoscopic Pilonidal Sinus Treatment – proceeds in two phases. In the first – diagnostic – phase, the sinus cavity and the sinus tracts are examined. The aim of the second – therapeutic – phase is to ablate the abscess cavity and to eliminate the fistula\(^2\). Both phases are performed under direct endoscopic control.

Special Features:

- E.P.Si.T. can be performed in an outpatient setting
- Ablation of the abscess cavity and elimination of the fistula under direct vision
- High patient satisfaction\(^3\)
- Straightforward, safe, effective and reproducible method of treatment\(^3\)
- Instruments can also be used to treat anal fistulas (VAAFT technique)
Fistulectomy Set,
including:
Fistuloscope 8°, angled eyepiece, outer diameter 3.3 x 4.7 mm, working length 18 cm
Handle
Obturator
Wire Tray for Cleaning, Sterilization and Storage
Sealing Cap “Endoscopic Seal”, sterile, package of 10

Sealing Cap “Endoscopic Seal”, for working channels of 4-10 Fr. instruments, sterile, for single use, package of 10

Coagulation Electrode, unipolar, for fistulectomy, 7 Fr., length 53 cm

Fistula Brush,
including:
3-ring Handle
Outer Sheath
Fistula Brush Insert, outer diameter 4 mm, unsterile, for single use
Fistula Brush Insert, outer diameter 4.5 mm, unsterile, for single use
Fistula Brush Insert, outer diameter 5 mm, unsterile, for single use

CLICKLINE REDDICK-OLSEN Grasping Forceps, rotating, dismantling, insulated, with connector pin for unipolar coagulation, with Luer-Lock irrigation connector for cleaning, double action jaws, size 2 mm, length 30 cm
including:
Plastic Handle, without ratchet, with larger contact area at the finger ring
Outer Sheath, with working insert

VAAFT Set – Video Assisted Anal Fistula Treatment

The VAAFT technique is suitable for the surgical treatment of complex anal fistulas and recurrences. VAAFT – Video Assisted Anal Fistula Treatment – proceeds in two phases. The purpose of the first – diagnostic – phase is to inspect the fistula pathway and to locate the internal fistula opening. The goal of the second – therapeutic – phase is the complete destruction of the fistula epithelium. Both phases are performed under direct endoscopic control.

Special Features:

- Exact localization of the internal fistula opening under visual control
- Complete elimination of the fistula from the inside
- Minimal postoperative trauma
- Significant time and cost-saving potential
- Fully autoclavable
24511  **Fistulectomy Set,**
including:
- **Fistuloscope 8°,** angled eyepiece, outer diameter 3.3 x 4.7 mm, working length 18 cm
- Handle
- Obturator
- Wire Tray for Cleaning, Sterilization and Storage
- **Sealing Cap “Endoscopic Seal”,** sterile, package of 10

100020-10*  **Sealing Cap “Endoscopic Seal”,** for working channels of 4-10 Fr. instruments, sterile, for single use, package of 10

24515  **Coagulation Electrode,** unipolar, for fistulectomy, 7 Fr., length 53 cm

24514  **Fistula Brush,**
including:
- 3-ring Handle
- **31 Ring Handle**
- **Outer Sheath**
- **Fistula Brush Insert,** outer diameter 4 mm, unsterile, for single use
- **Fistula Brush Insert,** outer diameter 4.5 mm, unsterile, for single use
- **Fistula Brush Insert,** outer diameter 5 mm, unsterile, for single use

30251 KJ  **CLICKLINE REDDICK-OLSEN Grasping Forceps,** rotating, dismantling, insulated, with connector pin for unipolar coagulation, with LUER-Lock irrigation connector for cleaning, double action jaws, size 2 mm, length 30 cm
including:
- **Plastic Handle,** without ratchet, with larger contact area at the finger ring
- **Outer Sheath,** with working insert

TEO® – Transanal Endoscopic Operations

The minimally invasive transanal platform for the treatment of rectal neoplasia

Transanal Endoscopic Operations (TEO®) combines the minimal invasiveness of an intervention via a natural body orifice (NOTES) with the precision of resection under endoscopic microsurgery.

Special Features:

- Available in lengths of 7.5, 15 and 20 cm
- Compatible with all standard camera systems for laparoscopy
- Mechanical holding arm enables the platform to be placed in a very stable position
Working lengths 7.5 and 15 cm

24941 BA  **HOPKINS® Forward-Oblique Telescope 30°**, angled eyepiece, diameter 5 mm, length 21 cm, autoclavable, fiber optic light transmission incorporated, color code: red

24942 TK  **TEO® Operating Rectoscope Tube**, outer diameter 40 mm, working length 7.5 cm, with handle for holding system, Luer-Lock connector for vapor evacuation

24942 T  Same, working length 15 cm

24942 OK  **TEO® Obturator**, for use with TEO® Operating Rectoscope Tube 24942 TK

24942 O  Same, for use with TEO® Operating Rectoscope Tube 24942 T

24942 AK  **TEO® Working Attachment**, with attachment for HOPKINS® Telescope 24941 BA, 2 channels for instrument size 5 mm and 1 channel for instruments up to size 12 mm, for use with TEO® Operating Rectoscope Tube 24942 TK

24942 A  Same, for use with TEO® Operating Rectoscope Tube 24942 T

Working length 20 cm

24941 BAL  **HOPKINS® Forward-Oblique Telescope 30°**, angled eyepiece, diameter 5 mm, length 28 cm, autoclavable, fiber optic light transmission incorporated, color code: red

24942 TL  **TEO® Operating Rectoscope Tube**, outer diameter 40 mm, working length 20 cm, with handle for holding system, Luer-Lock connector for vapor evacuation

24942 OL  **TEO® Obturator**, for use with TEO® Operating Rectoscope Tube 24942 TL

24942 AL  **TEO® Working Attachment**, with attachment for HOPKINS® Telescope 24941 BAL, 2 channels for instruments size 5 mm and 1 channel for instruments up to size 12 mm, for use with TEO® Operating Rectoscope Tube 24942 TL

25370 KG  **Dissection Hook Electrode**, proximally and distally bent downwards, needle-shaped

25351 MG  **CLICKLINE Dissecting and Grasping Forceps**, rotating, dismantling, insulated, with connector pin for unipolar coagulation, with Luer-Lock irrigation connector for cleaning, single action jaws, jaws offset downwards, 2 x 4 teeth, size 5 mm, length 36 cm

**Holding system – U-shaped**

28272 RLD  **Holding System**, U-shaped, autoclavable, with quick release coupling KSLOCK

Further instruments for transanal surgery can be found in the Proctology catalog.
TEO® Platform with Flexible Working Attachment and High-Flow Adaptor – B-PORT

TEO® (Transanal Endoscopic Operations) combines the minimal invasiveness of an intervention via a natural orifice (NOTES) with the precision of resection under visual control. A wide-lumen rectoscope enables precise guidance of operating instruments under endoscopic control. In cooperation with Prof. Luigi Boni, Milan, Italy, it was possible to optimize the TEO® platform for TaTME (Transanal Total Mesorectal Excision).

Special Features:

- Great freedom of movement thanks to flexible working attachment
- Instruments up to size 15 mm can be used
- The high-flow adaptor enables a fast and stable pneumorectum as well as effective smoke evacuation
- Straight distal end simplifies the placement of an endoscopic purse-string suture
- Also suitable for TaTME
24942 TKG  **TEO® Operating Rectoscope Tube**, outer diameter 40 mm, working length 7.5 cm, straight distal end, with handle for holding system, Luer-Lock connector for vapor evacuation

24942 OK  **TEO® Obturator**, for use with Operating Rectoscope Tube 24942 TK/24942 TKG

24943 S  **TEO® High-Flow Adaptor**, for S-PORT seal

23030 SA  **S-PORT Seal**, 4x access 3 mm, 5 mm or 13-15 mm

28272 RLD  **Holding System**, U-shaped, **autoclavable**, with quick release coupling KSLOCK

33362 ON  **CLICKLINE Grasping Forceps**, rotating, dismantling, without connector pin for unipolar coagulation, with Luer-Lock irrigation connector for cleaning, single action jaws, with especially fine atraumatic serration, fenestrated, size 5 mm, length 36 cm

  including:
  **Metal Handle**, with MANHES style ratchet, with larger contact area
  **Metal Outer Sheath**, insulated
  **Forceps Insert**

26775 C  **CADIERE Coagulation and Dissection Electrode**, insulated sheath, with connector pin for unipolar coagulation, L-shaped, with cm-marking, distal tip tapered, size 5 mm, length 36 cm

For use with:

- A standard telescope in size 5 mm or 10 mm, e.g., HOPKINS® Forward-Oblique Telescope 30°, diameter 5 mm, length 50 cm (art. no. **26048 BSA**)

- Standard instrumentation for laparoscopy or alternatively with instruments specially adapted for Transanal Endoscopic Operations (jaws offset downwards)

Further telescopes and standard instrumentation for laparoscopy can be found in the Laparoscopy catalog.

Instruments specially adapted for Transanal Endoscopic Operations can be found in the Proctology catalog.
D-PORT

The reusable D-PORT was designed and optimized for transanal surgery. It is also possible to perform Transanal Total Mesorectal Excision (TaTME) with this platform.

Special Features:

- Simultaneous CO₂ insufflation and smoke/gas evacuation possible
- Great freedom of movement due to flexible sealing cap
- Small outer diameter of 30 mm facilitates insertion in the anal canal
- Free choice of telescopes (5 mm or 10 mm)
- Reusable and thus cost-effective

To view the application video, please scan the QR code.
24944 TS  D-PORT, DAPRI Operating Rectoscope System
including:
DAPRI Operating Rectoscope Tube
Obturator
Seal

24944 SA  Seal, for DAPRI operating rectoscope tube, 3x access 5 mm, 10 mm and/or 13-15 mm
including:
Sealing Cap
3x Reducers, 13/5 mm and 13/3 mm
Reducer, 13/10 mm
Valve Seal, for instruments size 5 and 5.5 mm, package of 10
Valve Seal, for instruments size 10 mm, package of 10

26003 BA  HOPKINS® Forward-Oblique Telescope 30°, enlarged view, diameter 10 mm, length 31 cm, autoclavable, fiber optic light transmission incorporated, color code: red

23125 ONG  CLICKLINE Grasping Forceps, non-rotating, dismantling, insulated, with connector pin for unipolar coagulation, with LUER-Lock irrigation connector for cleaning, single action jaws, fenestrated, with especially fine serration, DAPRI sheath curve, size 5 mm
including:
Metal Handle, without ratchet, with 4 locking positions
Outer Sheath, with working insert

23775 CLG  Coagulation and Dissection Electrode, L-shaped tip, DAPRI sheath curve, size 5 mm

Further instruments for use with the D-PORT can be found in ENDOWORLD® PRO 5 “D-PORT – A new reusable platform for transanal laparoscopic surgery”.
ENDOFLATOR® 50 and S-PILOT® – The Perfect Combination

The ENDOFLATOR® 50 in conjunction with the KARL STORZ S-PILOT® creates the perfect prerequisites for optimal smoke evacuation. To make full use of the excellent flow rate provided by the insufflator, appropriate accessories are required.

Special Features:

- Stable OR field thanks to innovative regulation
- Gas heating adapts to various ambient conditions and reliably prevents telescope fogging
- Creates optimal viewing conditions and a stable OR field, even in small cavity surgery

Rectoscope for Video Documentation – RECTOVISION® with Sliding Cap

The combination of laparoscopic and rectoscopic technologies permits exceptionally good visualization and documentation of the intraluminal conditions in patients undergoing coloproctological interventions. Video rectoscopy is a straightforward and convenient procedure. RECTOVISION® is intended for use in both outpatient settings and surgical departments.

Special Features:

• Clear, high-resolution display of even the finest details
• Fully reusable; long service life
• Can be used with all 10 mm telescopes – also in conjunction with NIR/ICG for intraluminal perfusion assessment
• Stable examination field thanks to airtight sliding cap
24912 K  HEINKEL Rectoscope Tube, outer diameter 20 mm, working length 20 cm including:
   Obturator

24920  Illumination Head, for HEINKEL rectoscope tubes, with fiber optic light transmission, LUER-Lock hub for rubber insufflation bulb

24886 SOW  Airtight Sliding Cap, for centering a 10 mm telescope in HEINKEL rectoscope tubes ≥ 20 mm during documentation

30103 CS  Telescope Stopper, size 11 mm, sterile, for single use, package of 12

40924  Rubber Insufflation Tube, with detachable tube, with LUER-Lock including:
   Rubber Tube

031123-10*  Gas Filter, for fluid irrigation, with male LUER-Lock connector and female LUER-Lock connector, sterile, for single use, package of 10

26003 AA  HOPKINS® Straight Forward Telescope 0°, enlarged view, diameter 10 mm, length 31 cm, autoclavable, fiber optic light transmission incorporated, color code: green

or

26003 ACA  HOPKINS® Straight Forward Telescope 0°, enlarged view, diameter 10 mm, length 31 cm, autoclavable, for indocyanine green (ICG), fiber optic light transmission incorporated, for use with Fiber Optic Light Cable 495 NCSC, Fluid Light Cable 495 FQ/FR and Cold Light Fountain D-LIGHT P SCB 20 133701-1, color code: green

Note: The gas filter is positioned between the rubber ball and the rubber tube to prevent instrument contamination. Reprocessing of the rubber tube is nevertheless required when using Filter 031123-10*.
KARL STORZ TROIDL SILVER SCOPE® Flexible Rectoscope

The flexible TROIDL SILVER SCOPE® rectoscope combines the fundamental advantages of flexible endoscopy with the application possibilities of rectoscopy.

Special Features:

- Working length of 40 cm ensures easy handling
- Up to 210° inversion improves visualization and, consequently, diagnostic and therapeutic options thanks to forward and retrograde viewing
- Field of application especially suited for surgical conditions and procedures in the rectal area
- Fatigue-free work thanks to ergonomically shaped control unit
- Possibility to combine rigid and flexible endoscopy thanks to modular IMAGE1 S™ camera platform
13912 PKSK  TROIDL Rectoscope, flexible, 11.8 mm x 40 cm, color system PAL,
Direction of view: 0°
Sheath diameter: 11.8 mm
Working channel diameter: 3.4 mm
Deflection up/down: 210°/120°
Deflection left/right: 120°/120°
Field of view: 140°
Working length: 40 cm

13912 NKSK  Same, color system NTSC

For use with the following camera systems

- IMAGE1 S™
- IMAGE 1 HUB™ HD
- TELECAM/TELE PACK X GI

Please note:
One of the following video endoscope adaptors is required to connect the flexible TROIDL Rectoscope 13912 PKSK/13912 NKSK to a camera control unit:

For use with IMAGE1 S™
TC 001  IMAGE1 S™ Video Endoscope Adaptor, color systems PAL/NTSC, length 60 cm, for use with IMAGE1 S™ X-LINK TC 301

For use with IMAGE 1 HUB™ HD
22 2000 77  Video Endoscope Adaptor, color systems PAL/NTSC, length 90 cm

For use with TELECAM/TELE PACK X GI
20 2130 70  Video Endoscope Adaptor, for use between KARL STORZ video endoscopes and TELECAM Camera Control Units (CCU) or TELE PACK video units

Further information on the TROIDL flexible rectoscope and other flexible endoscopes, e.g., gastrosopes and colonoscopes, is available in the Proctology catalog.

Further information on camera systems is available in the Telepresence catalog.
Documentation in Proctology

The mobile all-in-one solution TELE PACK X GI provides clear patient information for procto- and/or rectoscopic examinations. The flexible TROIDL resectoscope as well as the rigid systems PROCTOVISION® and RECTOVISION® allow the visualization and documentation of all examination and/or therapy steps.

Special Features:

- The mobile all-in-one solution combines a monitor, camera control unit, LED light source, data management and an insufflation pump in one unit
- Universal use in doctors’ offices, emergency rooms and intensive care units
- Flexible and rigid endoscopes can be easily connected with suitable adaptors
- As well as presenting clear patient information, the documentation can be an effective aid for proctological training
- The integrated network function allows straightforward export of patient images and videos to the hospital or practice network
