CHOICE CHANGES EVERYTHING

Introducing FLEXPack Service for Flexible Intubation Endoscopes

With FLEXPack, you can purchase the number of exchanges you need at a discounted rate. FLEXPack Service Agreements cover a set number of exchanges for any breakage of your KARL STORZ Flexible Intubation Endoscopes over a 1-to-5-year term. If more exchanges are needed during the contract term, you can simply add more at the same discounted rate.

FLEXPack service enables you to:

- Measure and compare service on a cost-per-case basis
- Only purchase what is needed with no additional fees or premiums
- Manage repair budgets with predictable monthly service fees

THE GOLD STANDARD DOESN'T HAVE TO BE OUT OF REACH

Introducing FLEXPack Service for Flexible Intubation Endoscopes

While we understand there is a place for single-use scopes in your department, we know you want to use best-in-class reusable scopes when dealing with your more difficult and complicated cases. Additionally, there are some procedures where you simply can't use single-use scopes due to their size limitations. Thus, it is critical to have access to our reusable Flexible Intubation Endoscopes. Now with FLEXPack, you don't have to choose or settle.

The FLEXPack and Flexible Intubation Endoscopes: A winning combination

- Our reusable Flexible Intubation Endoscopes provide quality optics and best-in-class performance. The FLEXPack program allows you to have access to these reliable and robust scopes, when you need them.
- Ensure the benefits of maintaining the highest instrument quality — at the lowest service cost
- Adopt the Hybrid Approach with FLEXPack: reusable scopes for more specialized procedures, single-use scopes for everyday cases
- Efficiency, predictability of cost and safer patient outcomes
- Flexible Intubation Endoscopes available sizes between 2.8 and 6.5 mm allow you to cover a wider patient population and more procedures where single-use scopes are used
