

THE VERSATILE C-MAC® POCKET MONITOR WITH OPTIONAL EXTENSION CABLE

Intubate Confidently and Safely in Seconds

The KARL STORZ premier C-MAC® Pocket Monitor video laryngoscope, with 3.5 inch screen, can be equipped with an optional 50 centimeter extension cable between the viewing monitor and the intubation blade. The additional extension cable allows for the viewing monitor to remain outside of a recommended protective barrier, enabling optimal unobstructed visualization while maintaining a safe distance between clinician and patient.

- Creates a distance between patient and clinician
- Achieve unobstructed optimal visualization
- Fully immersible in High-Level Disinfectant (HLD) solution
- Perform rapid, secure intubations in seconds

THE VERSATILE C-MAC® POCKET MONITOR WITH OPTIONAL EXTENSION CABLE

A clear protective barrier is widely used to help prevent the spread of viral pathogens between patient and clinician during intubation. Unique to the KARL STORZ Pocket Monitor, the capability to separate the display from the unit is made possible by utilizing the 50 cm cable.

The C-MAC® Pocket Monitor and extension cable can also be fully immersed in a High-Level Disinfectant (HLD) solution for a thorough, confident cleaning.

The KARL STORZ Pocket Monitor is even more versatile with the addition of the optional 50 centimeter extension cable.

Product Numbers	
8403XDK	C-MAC® PM Set , screen size 3.5"
8403XDP	C-MAC® PM Connecting Cable , length 50 cm
