

SUPERIOR IMAGING AND INSTRUMENTS FOR COLORECTAL PROCEDURES

World-Class Scopes, Monitors, Service, & Support

Optimal procedures require exceptional visualization and image enhancement.

Our high-resolution flexible sigmoidoscope offers a large depth of field and uniform brightness, while the RECTOVISION® rigid laparoscopic and rectoscopic systems provide imaging and documentation during colo-proctological interventions.

The IMAGE1 S™ complete video solution features a modular camera-control unit that accommodates a wide range of camera heads and videoendoscopes.
