

HD FLEXIBLE VIDEO RHINO-LARYNGOSCOPE FOR DIAGNOSIS IN ENT

Enabling Anywhere Care – HD Flexible Laryngoscopy

The new HD Video Rhino-Laryngoscope allows visualization in HD image quality resulting in superior color reproduction making even small vessels visible on the vocal cords.

- Aids physicians in early diagnosis and intervention, including stroboscopy and FEES in HD quality
- Improved clinician experience - a brilliant, brighter, high-contrast image via the TELE PACK+ large HD display
- Flexibility due to the connectivity to the TELE PACK+ or IMAGE1 S™ camera system
- Option for thumb or index finger deflection lever activation

HD FLEXIBLE VIDEO RHINO-LARYNGOSCOPE FOR DIAGNOSIS IN ENT

Enabling Anywhere Care – HD Flexible Laryngoscopy

Stroboscopy

Valued for its excellent ability to examine the structure and the function of glottis during phonation, stroboscopy adds more to the diagnosis than flexible laryngoscopy alone. In fact, it provides information which is not available with any other diagnostic method.¹

FEES

Each year, approximately one in 25 adults will experience a swallowing problem (dysphagia) in the United States! If not diagnosed or treated, more serious complications can develop. Early recognition and intervention can reduce morbidity, hospital admission and length of stay.²

Ordering Information	
11101HDK	HD Video Rhino-Laryngoscope, direction of view 0°, angle of view 100°, working length 30 cm, outer diameter 3.7 mm, deflection up/down 140°/140°
40160040	Stroboscopy Kit, for use with KARL STORZ TELE PACK+ (TP101) and TELE PACK X LED (TP100EN). Includes foot pedal and microphone set
TP101-HN	TELE PACK+, endoscopic video unit with 2 camera inputs including: Mains cord, length 300 cm
TH110-HN	IMAGE1 S™ HX/HX-P One-Chip FULL HD Camera Head, high-definition
20040282-HN	USB Flash Drive, 32GB
9700TPX-HN	Rolling Stand
