IMAGE1 S™ RUBINA™ – mORe to discover

The IMAGE1 S™ 4U RUBINA™ camera head combines 4K imaging technology with fluorescence imaging in the near infrared range for the display of indocyanine green (ICG). OPAL1® NIR/ICG technology and the marker indocyanine green (ICG) enable non-radioactive visualization of the entire lymph system surrounding a tumor in real time. The new Overlay, Monochromatic and Intensity Map image modes can provide additional information about the sentinel lymph node.
